PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building responsive, scalable, and secure web applications across the MERN and PHP/Laravel stacks. Proficient in React.js, Node.js, Express.js, Python, and Django for developing end-to-end CRUD applications, RESTful APIs, and authentication systems using JWT and session-based methods. Skilled in relational and NoSQL database design with MySQL and MongoDB, API integration, and version control using Git and GitHub. Adept at translating business requirements into clean, maintainable code, collaborating effectively within cross-functional teams, and delivering client-facing solutions on schedule. Brings an additional 3+ years of Graphic Design experience, providing a strong eye for UI/UX and polished, user-centered interfaces alongside core software engineering strengths.

TECHNICAL SKILLS

Languages: PHP, JavaScript (ES6+), Python, SQL

Frontend: HTML5, CSS3, Bootstrap, React.js, Responsive Design

Backend: Laravel, PHP, Node.js, Express.js, Django, Python

Database: MySQL, MongoDB, SQLite

API Development: REST APIs, JSON, API Integration

Authentication: JWT Authentication, Session Authentication, Password Hashing

Tools: Git, GitHub, Composer, Postman, VS Code, Cursor AI, OpenCode, K6, Anti Gravity

CMS: WordPress

AREAS OF EXPERTISE

- Full Stack Development
- Backend Development
- Frontend Development
- REST API Development
- Authentication Systems
- Database Design
- UI/UX
- Graphic Design
- Problem Solving
- Team Collaboration
- Project Management

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer

Aug 2025 – Present

Remote — Local & International Clients

- Designed and developed full-stack web applications for local and international clients using React.js, Node.js, Express.js, and MongoDB, delivering responsive and production-ready solutions.
- Built and maintained custom PHP and Laravel applications with MySQL databases, implementing secure authentication, CRUD functionality, and role-based access control.

- Developed and integrated RESTful APIs to connect front-end interfaces with back-end services, ensuring reliable data flow and efficient performance.
- Managed the complete project lifecycle from requirements gathering and planning through development, testing, and deployment, while communicating directly with clients on progress and feedback.
- Diagnosed and resolved bugs across the stack, optimizing application performance and improving overall code quality and maintainability.

Graphic Designer

3+ Years Experience

Branding, UI/UX & Digital Design

- Designed brand identities, logos, and marketing materials for a range of clients, ensuring consistent visual language across print and digital channels.
- Created UI/UX design concepts and wireframes using Figma and Adobe XD, translating design mockups into functional, developer-ready assets.
- Produced social media graphics, promotional content, and print collateral using Adobe Photoshop and Illustrator to support marketing campaigns.
- Developed logo design systems and comprehensive branding guidelines for small businesses and personal brands.
- Collaborated with marketing and development teams to align visual design with product and business goals.

Web Developer

A² Software House

- Contributed to website development and maintenance projects, ensuring functional, well-structured code across client sites.
- Collaborated with a team of developers to design and build responsive, cross-browser-compatible web solutions.
- Assisted with both front-end and back-end development tasks, supporting the team throughout the project lifecycle.

Freelance SEO Developer

Remote

- Performed on-page and off-page SEO for client websites, improving search visibility through keyword research, content optimization, and link building.
- Conducted technical SEO audits to identify and resolve indexing, speed, and metadata issues affecting search rankings.
- Tracked keyword performance and search rankings, adjusting strategy based on analytics to improve organic traffic.

PROJECTS

Hospital Management System

Technologies: *Python, Django, SQLite/MySQL*

- Engineered a comprehensive Hospital Management System using Python and Django, managing patients, doctors, departments, appointments, medical records, and billing in a single unified platform.
- Implemented secure authentication and an admin dashboard with role-based access control, allowing differentiated permissions for administrators, doctors, and staff.
- Designed a normalized relational database schema in SQLite/MySQL to efficiently store and retrieve patient records, appointment schedules, and billing data.
- Built full CRUD operations for all core modules, enabling seamless creation, retrieval, updating, and deletion of hospital records.
- Applied Django's ORM and built-in security features to safeguard sensitive medical and billing information against unauthorized access.

E-Commerce Website

Technologies: *React.js, Node.js, Express.js, MongoDB, JWT, REST APIs*

- Developed a full-featured E-Commerce platform using React.js, Node.js, Express.js, and MongoDB, supporting end-to-end online shopping workflows.
- Implemented secure JWT-based authentication and an admin dashboard for managing products, categories, and customer orders.

- Built product management functionality with category organization, enabling efficient catalog browsing and inventory updates.
- Designed shopping cart and wishlist features with persistent state, improving user experience and encouraging repeat engagement.
- Integrated RESTful APIs between the React front end and Node/Express back end, ensuring smooth, real-time data synchronization with the MongoDB database.

PHP CRUD Management System

Technologies: *PHP, MySQL, SQL*

- Built a PHP CRUD Management System supporting complete Create, Read, Update, and Delete operations against a MySQL database.
- Implemented session-based authentication to secure access to administrative functionality.
- Applied server-side form validation to ensure data integrity and prevent invalid or malicious input.
- Structured the application using a clean, professional folder architecture for maintainability and scalability.
- Optimized SQL queries for reliable database connectivity and efficient data retrieval.

Weather Application

Technologies: *React, REST APIs, JavaScript*

- Developed a Weather Application in React that fetches and displays real-time weather data via third-party REST APIs.
- Implemented dynamic search functionality allowing users to retrieve current weather conditions for any city.
- Built a fully responsive UI with JavaScript, ensuring consistent usability across desktop and mobile devices.
- Handled asynchronous API requests and error states to provide a smooth, reliable user experience.

SOFTWARE PROFICIENCY

Core Tools & Technologies: PHP, Laravel, React, Node.js, Python, Django, MySQL, MongoDB, Git, GitHub, Composer, Postman, Photoshop, Illustrator, Figma, Adobe XD

EDUCATION

Bachelor of Computer Science **Expected 2027**

University of Sahiwal

CGPA: 3.43 / 4.00

LANGUAGES

English • Urdu

SOFT SKILLS

Communication • Leadership • Analytical Thinking • Critical Thinking • Problem Solving • Time Management • Teamwork

VOLUNTEERING & MENTORSHIP

Graphic Design Mentor

Al Khidmat Foundation — Bano Qabil Program

- Mentored trainees in graphic design fundamentals, covering branding, typography, and design software including Photoshop and Illustrator.
- Reviewed trainee design work and provided practical feedback to help build industry-ready design skills.
